

Airfilter, silencer and so on

1. Battery charger. No more empty battery at the beginning of the season or after a longer driving break. The battery is always fully loaded and you get a longer life of the battery. For lead batteries with capacities from 2.5 to 100 Ah for continuous charging, for motorcycle batteries for recharging also. Short circuit safe. With LED lamps for function, wrong connection, connectors short circuit and dead battery. The charger can be used in garages etc. and can be fixed at the wall.

Continuous charger with connection pliers. art.: 940.1

Continuous charger with plug for your plug in socket for easy connection without any dismantling. art.: 940.2

To revitalize sulfatized batteries use the **continous charger with connection pliers** art.: 940.3 For other datas see pos.: 1
