

# The way to your individual HPN

Each HPN is unique. On these pages you see the different basic-concepts for the sportster, connoisseur, adventurer, rallye- and touring rider. Follow the build-up of your dream bike from the roots, completed with your individual chosen ac-

cessory. The basis is a frame of the BMW 247E series (R80G/S from '80, 100GS from '87, R80GS basic from '96, R80ST and R100R), that gets prepared for its new life with the HPN reinforcements. Our basic concepts differ in the swing

arm construction that defines the character and main purpose of our motorcycles. Here is a short survey.

## HPN Basis

The owner of a BMW GS - '87 composes it's wolf in a sheeps fur using the HPN Basis components.

## HPN/Kronseder

Some crafty customers have used their creativity in a lot of details to create their own dream motorcycle.

## HPN Baja

For the customer that owns a R80G/S or a R80ST the monolever is the right choice. Varying accessories (tanks etc.) make a range from the HPN Baja to the long distance tourer HPN Adventure. All BMW 247E motorcycles are a suitable basis.

## HPN Adventure
